

As we are sure most are aware at this point, Pennsylvania American Water Company has replaced the main water line on Maple Street in Annville. The project has impacted the roadway from the intersection of N. College Ave. to N. Weaver St. and is scheduled to be completed by the fall of 2024, as the roadway will be re-paved during 2024. During this time there will be intermittent road closures and you will not be able to park on Maple St. while work is being done.

Please observe signage posted in the affected area that will communicate road closures and prohibited parking.

---

Please note that Church Street, from the intersection of N. King Street to 934, is scheduled to have a main water line replaced starting in March 2024 and then be paved in later in the year. During this time there will be intermittent road closures and you will not be able to park on Church Street.

Please observe signage posted in the affected area that will communicate road closures and prohibited parking.

---

Please note that Marshall Street, from the intersection of S. Lancaster Street to 934, is scheduled to have a main water line replaced starting in April 2024 and then be paved in later in the year. During this time there will be intermittent road closures and you will not be able to park on Marshall Street.

Please observe signage posted in the affected area that will communicate road closures and prohibited parking.

---

Please note that E. High Street, from the intersection of 934 to the dead end at the park entrance, is scheduled to have a main water line and house services replaced, as well as ADA ramps updated at certain locations, followed by blacktopping starting in Spring/Summer 2024 and then be paved Fall 2024/Spring 2025. During this time there will be intermittent road closures and you will not be able to park on E. High Street.

Please observe signage posted in the affected area that will communicate road closures and prohibited parking.

---

Please note that Elm Street, from the intersection of E. High Street to Locust Street, is scheduled to have ADA ramps updated at certain locations, followed by blacktopping at a later time. During this time there will be intermittent road closures and you will not be able to park on Elm Street.

Please observe signage posted in the affected area that will communicate road closures and prohibited parking.

---

Please note that Locust Street, from the intersection of S. Manheim Street to the dead end, is scheduled to have storm sewer work performed, followed by blacktopping at a later time. During this time there will be intermittent road closures and you will not be able to park on Locust Street.

Please observe signage posted in the affected area that will communicate road closures and prohibited parking.
