

## **PAVING 2025**

**Locust, Elm and East High Streets are schedule to have the main water line replaced/stormwater pipe installed in Spring of 2025. Repaving of these streets is scheduled to occur in the Fall of 2025.**

**Should owners of properties on Locus, Elm and East High Streets desire to make any improvements to your property that would necessitate cutting the street (such as connecting to a natural gas line, making alterations to existing natural gas or replacing curbing or sidewalks) you will need to do so before paving commences.**

**Ordinance No. 625 specifically limits any cutting to a street within five years of its paving. Please plan accordingly.**
